## WHO ARE WE?

We would like to introduce the VICINO brand created by Bovelli Bedding Sp. z o.o. Bovelli is a recognized Polish manufacturer of upholstered furniture, specializing in the production of continental beds with mattresses, headrests and pouffes.

The quality of our products is appreciated by Europeans from many EU countries who for years have been sleeping healthily and comfortably on continental beds produced by Bovelli Bedding sp. z o.o. Our products combine Polish quality and workmanship, Belgian experience and Italian finesse.

We put all our passion and love of beauty into making our beds. We pay a lot of attention to care for natural environment. We use natural raw materials in our beds, we also have modern, environmentally friendly technological lines. We are a family company and we care that our children live in a clean world and a healthy climate.

The company has won numerous awards and distinctions. It has been appreciated both as a trustworthy partner, a thriving exporter to European markets and a promoter of Polish design. It also actively supports various charity campaigns.

## VICINO BRAND

The VICINO brand is the result of an analysis of our products and approach to life. Vicino reads as close in the sense of both physicality and spirituality. The slogan *La culla dei sogni*, translated from Italian: the cradle of dreams, perfectly reflects what we would like to offer in our products.

Ergonomics, functionality and durability are the most important features of our beds. Equally important to us are beauty, high quality and modern design as well as the materials used to make the beds.

It is easy to calculate that a person sleeps about 20 years, on average, during their lifetime! Hence, the selection of the right bed is extremely important for our health and mental well-being. Please note that there is no universal bed. As people and their needs are different, so are beds.

So how do you choose the right bed for you? We will advise you step by step on what you should be looking for when buying a bed that will optimally provide what is best for your health.

## WHAT IS A CONTINENTAL BED?

A Continental bed, also called a BOX SPRING, is a piece of bedroom furniture with built-in springs, a mattress and an additional top mattress, called a topper.

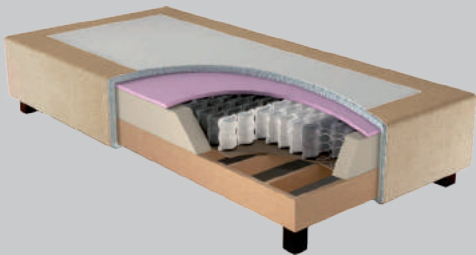

These types of beds are high, which makes them comfortable and especially suitable for people with health problems. The top layer of the mattress is at a height from 62 cm.

Let us remember that in our homes and apartments, the bedroom is one of the most important rooms. It is a place of intimacy and closeness with another person, it is our sanctuary from the surrounding world.

**TOPPER,**  
a top mattress  
with different levels  
of flexibility, which  
also serves to unite  
the main mattress  
into one surface.

## WHAT IS WORTH CONSIDERING WHEN BUYING A BED?

**SIZE OF THE ROOM.** Remember to maintain the appropriate ergonomics. It is a good idea to provide sufficient space between the bed and other bedroom furniture. The minimum recommended distance is 60 cm.

**ORIENTATION OF THE BED** towards the morning sun. Orientation of the bed to the east or possibly northwest is recommended.

**THE SIZE OF THE BED** that we choose is precisely determined by how much space we have in the bedroom, among other things.

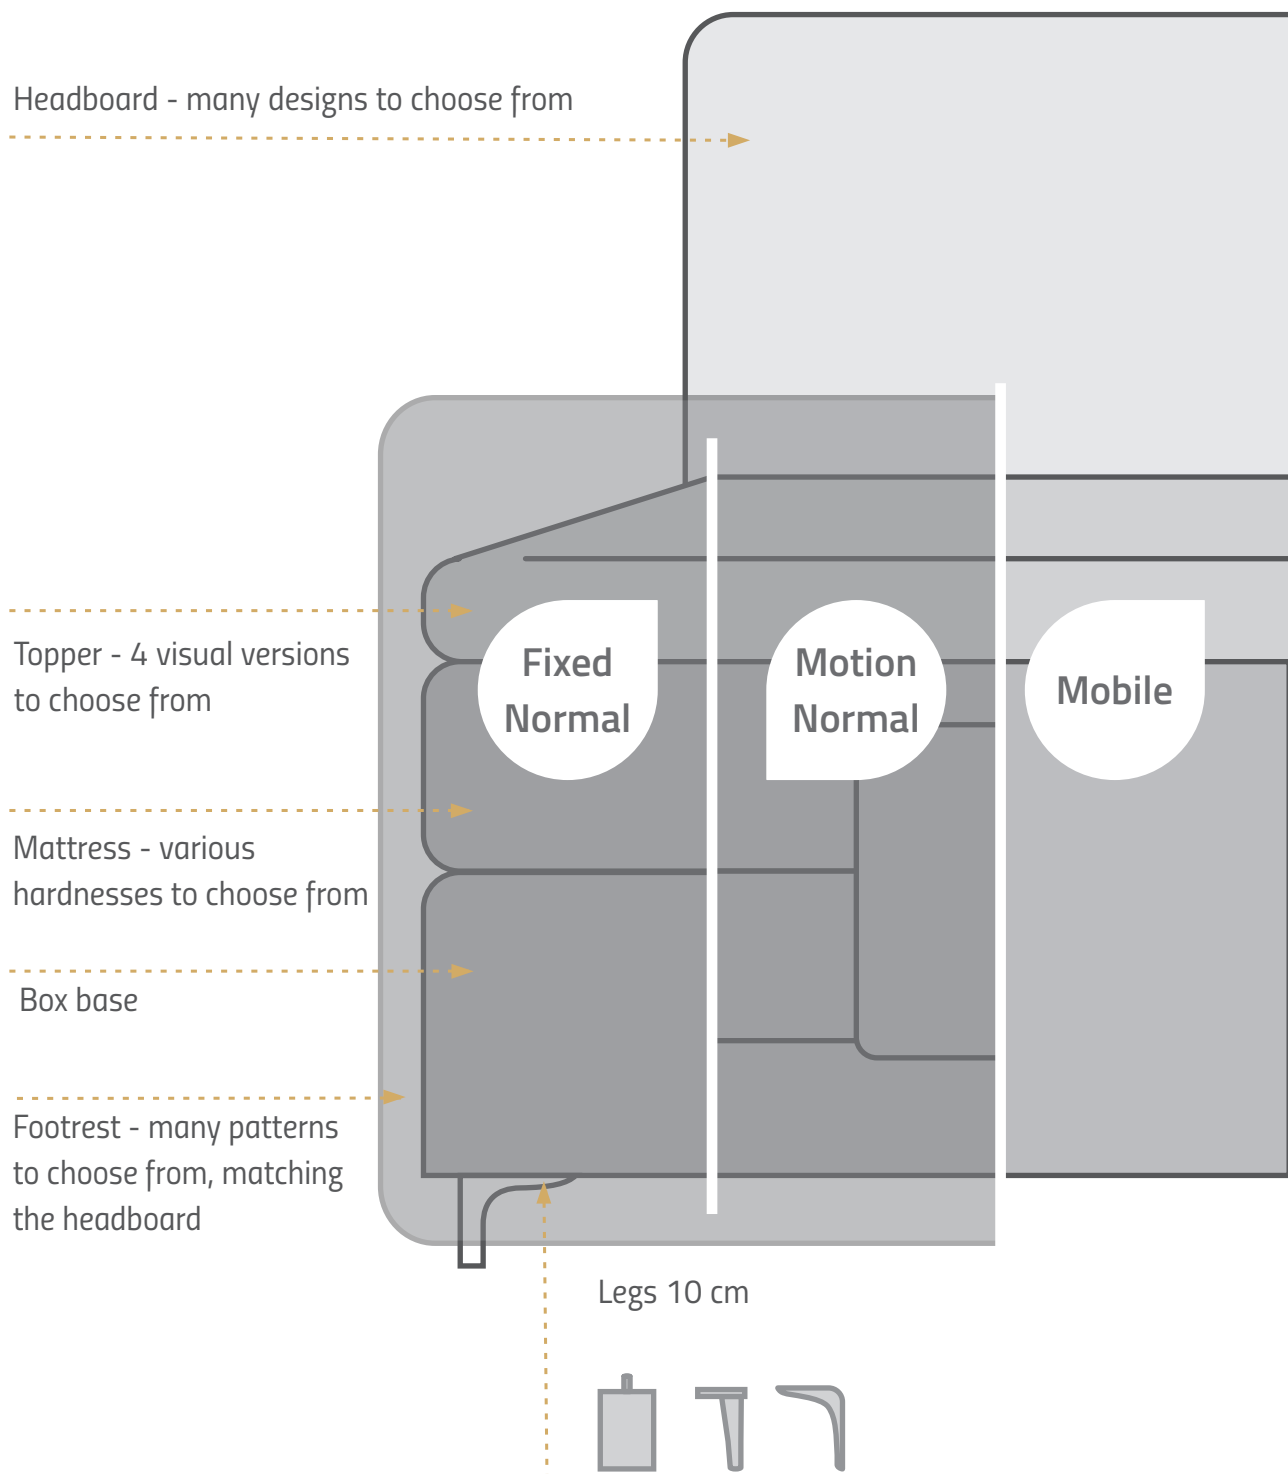

**FUNCTIONALITY OF THE BED,** a choice between wanting a classic bed (FIXED) or a movable bed with an electric motor (MOTION). It is worth paying attention to whether we need a bed with a bedding container (STORAGE).

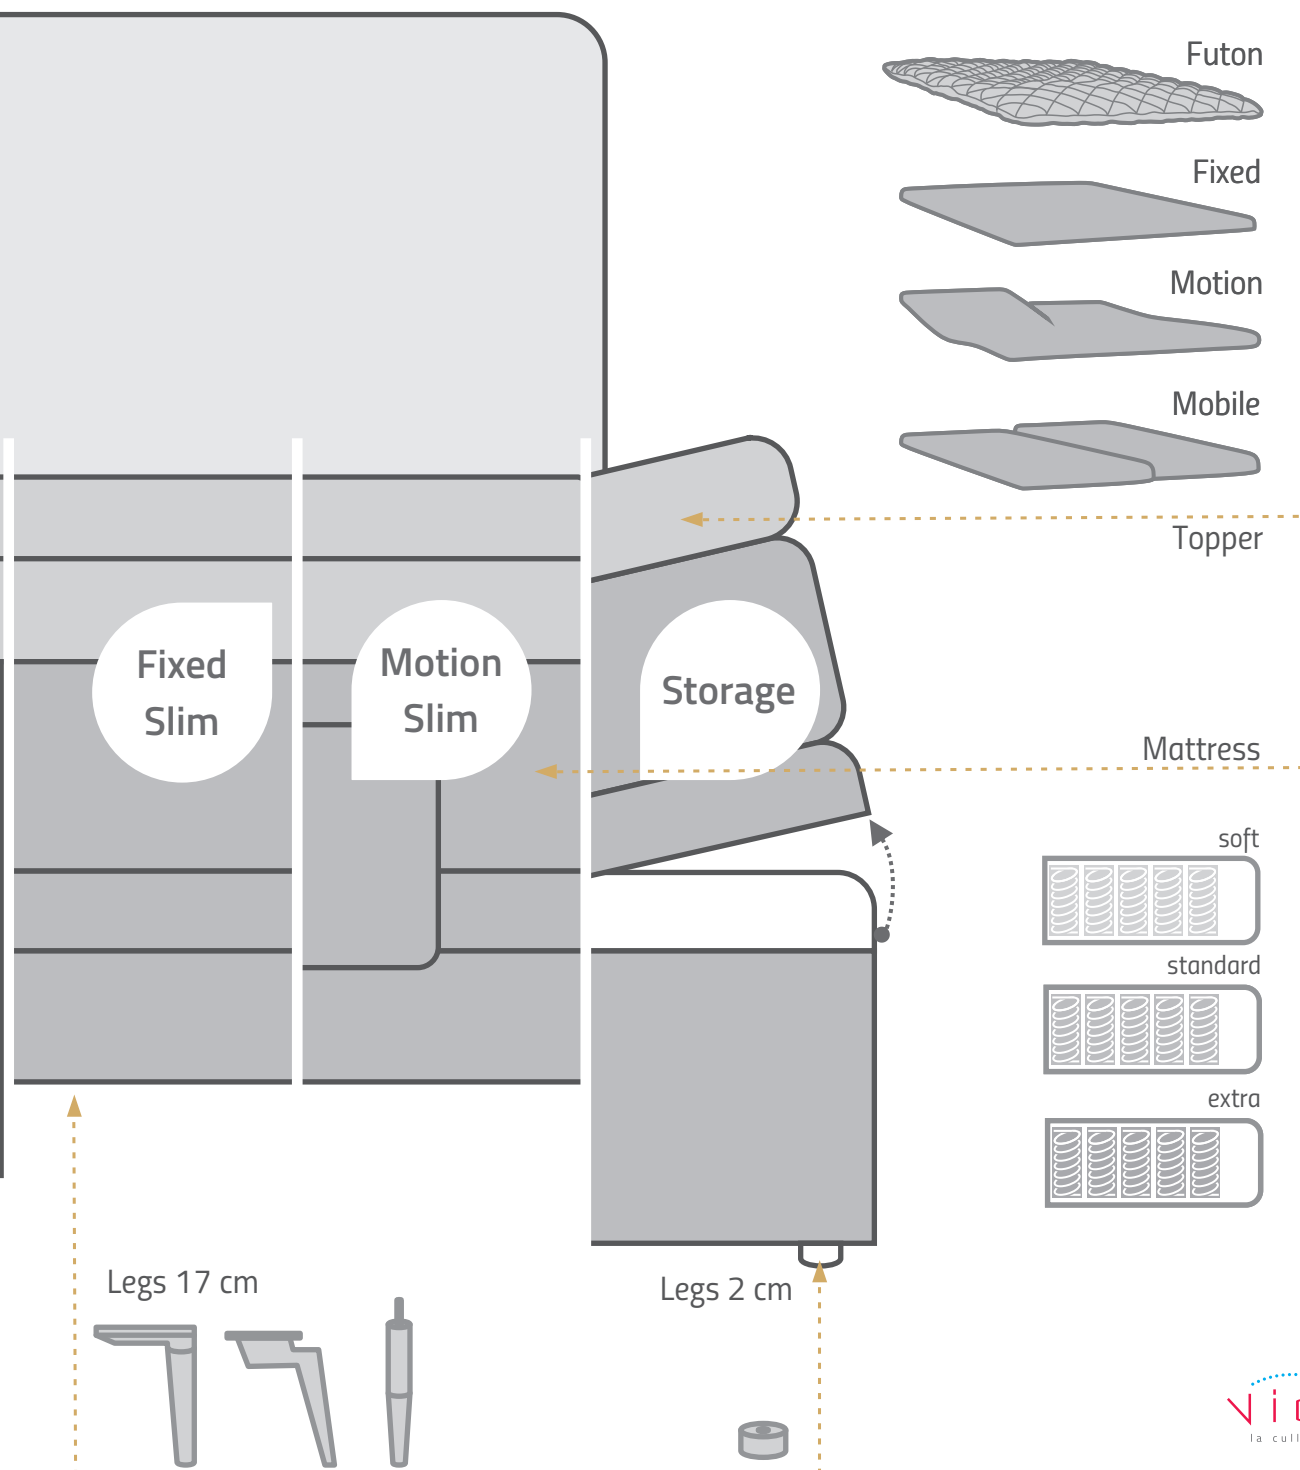

ON THE PICTURE: Classic bed (NORMAL) with small box (NORMAL). Headboard from CLARENCE collection

# TYPES OF CONTINENTAL BEDS

The VICINO continental bed configurator below will assist you in making the right choice of individual elements to meet your needs and requirements

01

## 9 STEPS TO CHOOSING A BED

### FUNCTIONALITY

- CLASSIC BED (Fixed) \* a bed with a static structure on a solid wood base
- ELECTRIC BED (Motion) \*the lower frame is equipped with a bed-lifting mechanism controlled with a remote control
- MOBILE BED (daru colletion) low, wooden box with two separate mattresses. It can be divided into two separate single beds or coupled into a double, with replaceable covers
- STORAGE BED (koofer colletion) a bed with a bedding container, e.g., for extra sheets

NOTE: The above beds may be equipped with a mechanism that lifts only one side of the bed, with the other remaining static, hence making the bed half-classic and half-electric. The solution is especially recommended for couples with different spinal conditions.

FOR DETAILS SEE PAGE 14

02

### EXTERNAL APPEARANCE

- LARGE BOX SPRING (Normal)\*
- SMALL BOX SPRING (Slim)\*

In both cases the total height of the bed is 62 cm

\*NOTE: The two beds are of equal height. The thickness difference of the boxes does not affect the height of the beds. The height difference of the boxes is leveled by the height of the legs.

\*NOTE: for classic (Fixed) and electric (Motion) beds only, skip this step for mobile and box spring beds

FOR DETAILS SEE PAGE 14

03

### THE SIZE OF THE BED AND MATTRESS

Double Bed - the bed has two separate bases.

A single bed is available in the following widths:  
70 /80 /90 /100 /120 cm.

A double bed is available in the following widths:  
140 /160 /180 /200 cm.

The beds are available in the following lengths:  
200 /210 /220 cm

You can choose two single mattresses or one double mattress (e.g. for a bed 140 cm wide you can choose one 140 cm or two 70 cm mattresses).

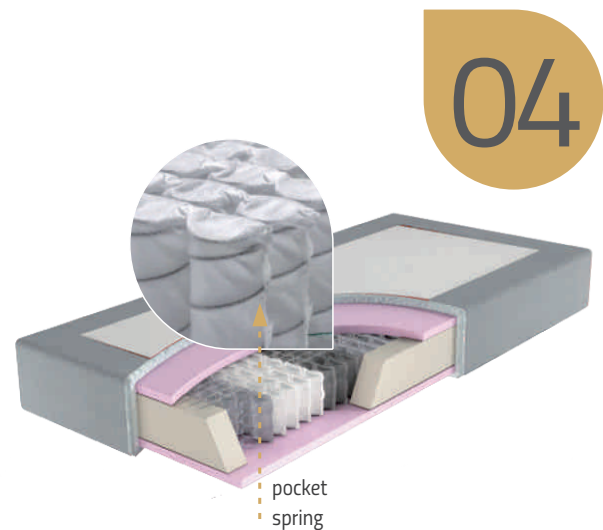

FOR DETAILS SEE PAGE 14

## FIRMNESS OF A MATTRESS

The feeling of mattress firmness is a subjective assessment of each user. The purpose of a mattress is to provide proper support for the body and the spine during sleep.

During sleep, the spine should be kept in a stable position, in a straight line.

FOR DETAILS SEE PAGE 16

## HEADBOARD AND FOOTBOARD

The choice of a headboard does not affect the comfort of sleep. It depends on the individual preferences of the users. Our offer includes over a dozen different designs of headboards for continental beds

The choice of footboard is optional. If selected, it is equal to the width of the respective bed size.

NOTE: The headboards offered in all our collections are available in different widths ranging. The height of the headboard depends on the model.

FOR DETAILS SEE PAGE 18

## FABRIC

We offer a selection of over 30 types of upholstery fabrics. The fabric does not affect the comfort of sleep. It depends on the individual preferences of the users.

The types of fabrics change depending on fashion trends. The current selection of fabrics is available at <https://www.vicino.eu>.

07

## MATTRESS TOPPER

A topper improves comfort of rest, protects the mattress from damage or dirt and allows to adjust the firmness to individual needs. The topper is usually 8 cm thick or 10 cm thick for the Futon model.

It can be made of polyurethane foam, thermoelastic foam, latex or gel filling.

FOR DETAILS SEE PAGE 22

08

## LEGS

Our offer includes a number of different leg types. For small box SLIM we recommend the 17-cm legs, for large box NORMAL the 10-cm legs. STORAGE beds – the 2-cm legs .

FOR DETAILS SEE PAGE 58

09

## ACCESSORIES

A selected bed may be complemented by a bedding container, a cushion and/or a bedcover or night table.

FOR DETAILS SEE PAGE 58

**Mattress  
HYR SOFT**

**Mattress  
HYR  
STANDARD**

**Mattress  
HYR  
EXTRA**

**04 FIRMNESS OF A MATTRESS**

VICINO bed mattresses have built-in pocket springs which are characterized by perfect zonal adjustment to your body weight, thus ensuring ideal cushioning properties. Mattresses are made with seven zones of hardness, arranged in accordance with a human's anatomical structure. This solution causes the body to press evenly against the entire surface of the bed.

The core of each mattress is a high quality 7-zone pocket spring. There are over 270 springs per m<sup>2</sup>. The spring is surrounded by foam profiles. The foam is the same for both the lower and the upper side of the mattress.

All elements that require connection are glued with the highest quality thermo-melting glue. The glued mattress is covered with a special cotton mesh, which facilitates putting on the proper cover and protects the mattress during cleaning the top cover.

### SOFT (1.6/1.8 mm\*)

recommended especially for persons who weigh 60 kg or less, are taller than average and sleep mainly on their back

### MEDIUM - STANDARD (1.8/2.0 mm\*)

recommended especially for persons who weigh 90 kg or less, are taller than average and sleep mainly on their back

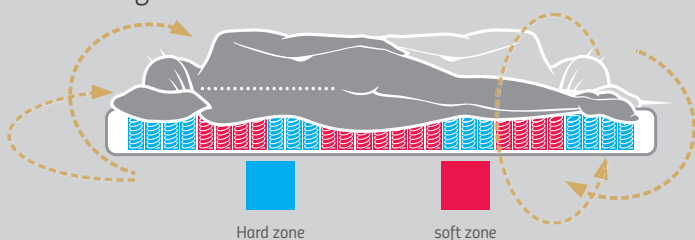

### HARD - EXTRA (2.0/2.2 mm\*)

recommended especially for persons who weigh more than 90 kg, are shorter than average and sleep mainly on their side

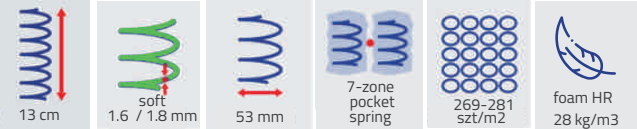

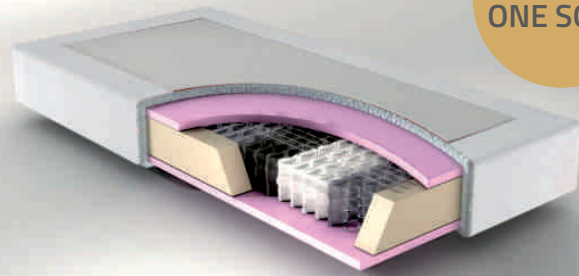

\* the thickness of the wire from which the springs are made

NOTE: Each type of mattress comes in two options for the firmness of the outer foam – higher (35 kg/m<sup>3</sup>) and lighter (28 kg/m<sup>3</sup>). If you decide to place two separate mattresses on your bed, the mattresses can be of different firmnesses, adapted to the individual using a given mattress.

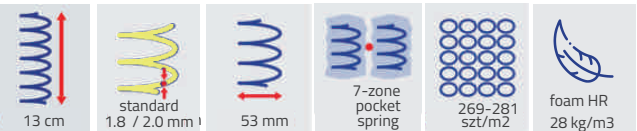

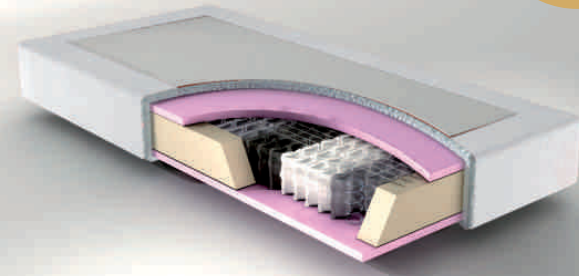

The symmetry of the firmness zones allows the mattress to be placed on either side. In addition, the mattresses used in VICINO beds are double-sided, which ensures their lasting comfort and long-term satisfaction thanks to the possibility of using them on both sides.

## HEADBOARDS AND FOOTRESTS

Our beds are available with many models of headboards. Headboards are often the essence of the whole continental bedroom. They're the crowning glory of a bed and its greatest decoration. Their look differs in shape and the type of fabric used.

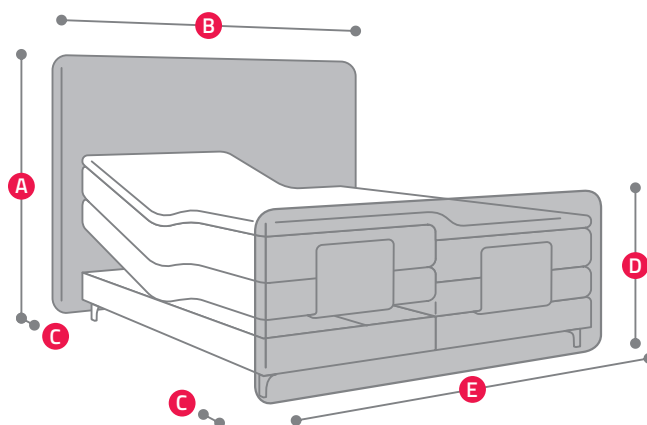

With the greatest attention to detail, we create headboards in a wide variety of styles. Our headboards are entirely hand-made products.

The headboard can be accompanied by a matching footboard, which is an additional option depending on the users' personal preferences.

## 07 TYPES OF TOPPER MATTRESSES

Topper - a topper mattress is an additional layer on top of the main mattress, leveling the sleeping surface, providing proper body support while sleeping. Inside the topper is 5 centimeters of foam to choose from four different types.

### Topper GEL 8 cm

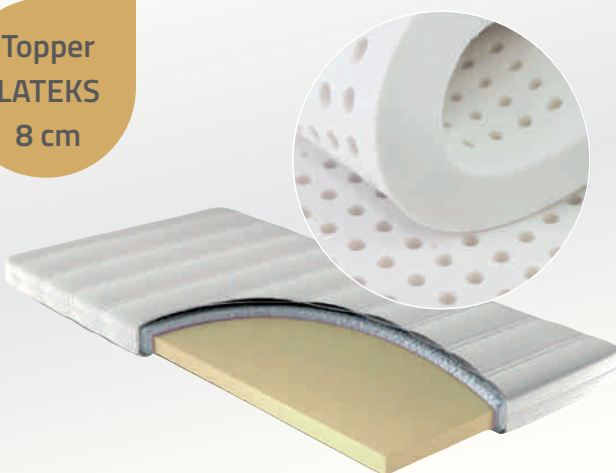

### TOPPER 8 CM GEL

Provides high breathability and excellent moisture exchange. Recommended for people with allergies. It has antibacterial and antifungal properties and is easy to remove stains

- cover made of Polish knitted fabric
- quilted fabric  $350\text{g}/\text{m}^2$
- furniture wadding
- full  $360^\circ$  zip
- 5 cm gel foam |  $48\text{ kg}/\text{m}^2$

### Topper LATEKS 8 cm

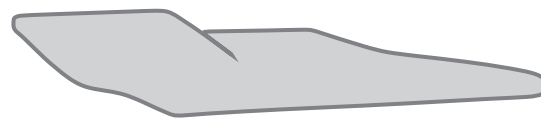

### TOPPER 8 CM LATEKS

Very durable, reduces back pain, wicks moisture well, safe for people with allergies, antibacterial and antifungal properties

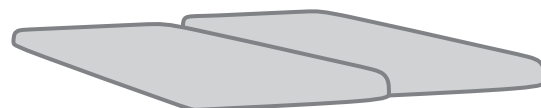

- cover made of Polish knitted fabric
- quilted fabric  $350\text{g}/\text{m}^2$
- furniture wadding
- full  $360^\circ$  zip
- 5 cm latex foam |  $48\text{ kg}/\text{m}^2$

The type of topper should be chosen first of all according to the type of bed. FUTON and FIXED toppers are recommended for NORMAL, SLIM and STORAGE beds. MOBILE topper fits DARU bed, and MOTION topper fits electric or box beds. In the next step we focus on the choice of the top mattress filling from a specific type of foam.

MOTION

MOBILE

### TOPPER 8 CM VISCO

Made of very soft thermoplastic foam, recommended for people weighing up to 65 kg, Visco foam called "memory", thanks to its thermoplastic properties adapts perfectly to the shape of our body.

- cover made of Polish knitted fabric
- quilted fabric 350g/m<sup>2</sup>
- furniture wadding
- full 360° zip
- 5 cm Visco foam | 50 kg/m<sup>2</sup>

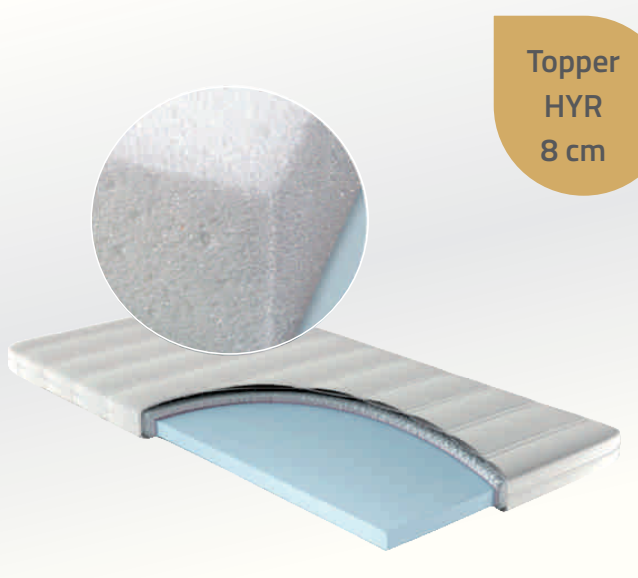

Topper  
VISCO  
8 cm

### TOPPER 8 CM HYR

Top mattress made of highly flexible foam, resistant to deformation, adapts to the user's body, perfectly supports the spine, recommended for people weighing over 90 kg

- cover made of Polish knitted fabric
- quilted fabric 350g/m<sup>2</sup>
- furniture wadding
- full 360° zip
- 5 cm HR foam | 35kg/m<sup>2</sup>

Topper

## collection

---

# ALOR

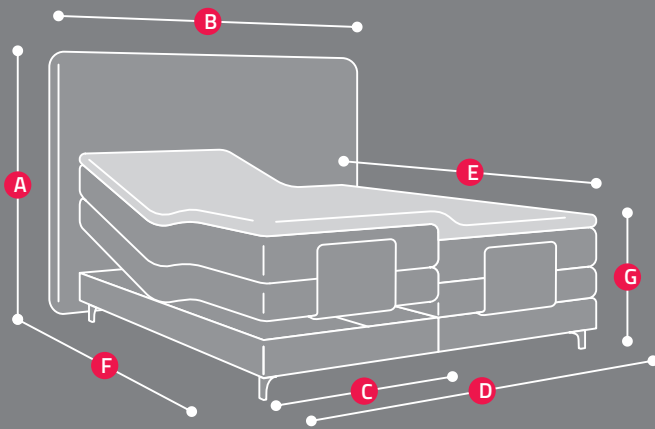

ALOR collection combines elements of the best baroque tradition with modern colors and technology. The beautiful shape of the headboard and footboard (as an additional option) makes ALOR bed a real ornament of each bedroom

The bed is made with the highest precision. All overlaps are laid by hand, and each button is quilted according to the traditional method.

ALOR is also available in an electric version (MOTION). The possibility to control the bed with a wireless remote control makes the ALOR bed even more comfortable.

For people with different requirements there is an option to configure one part of the bed in classic form, and the other with an electric MOTION system. .

collection  
 ———  
**ROSSA**

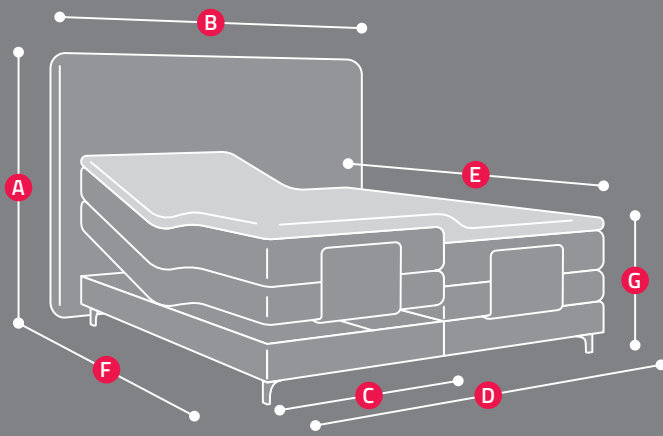

Beds from the ROSSA collection are a proposal for people attached to the traditional decor, but at the same time wanting to break the style of the interior with a little more modern look.

Symmetrical stitching of the headrest and the double thickness of foam influence the comfort of use, and at the same time its attractive design.

ROSSA bed looks very good when combined with a footrest, emphasizing the character of the furniture.

ROSSA is also available in an electric version. The possibility to control the bed with a wireless remote makes the ROSSA bed even more comfortable.

collection

# SENJE

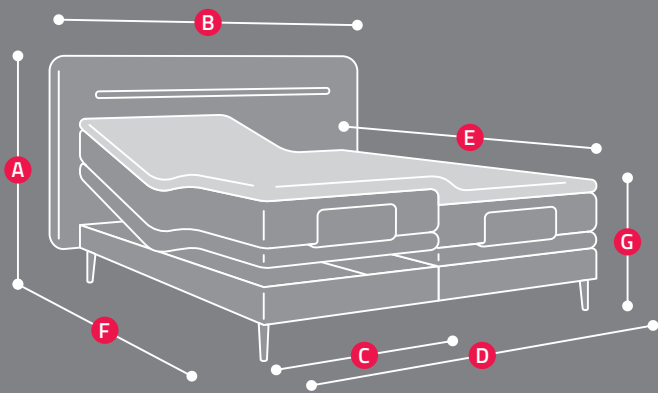

SENJE collection is a modern version of a continental bed. Its style fits perfectly into modern interiors.

SENJE beds are available only in SLIM version, i.e. with a small box. Thanks to the use of ultra low pocket springs, beds in this collection have an extremely light structure, while maintaining the highest level of comfort.

The proper height of SENJE beds is ensured by 17 cm high slender legs. The impression of lightness is also emphasized by the headboard attached on special holders.

The character of the model is obtained by the horizontal slat made of beech wood (various colours to choose from), which perfectly matches the soft headrest.

The SENJE bed is also available in an electric version.

colletion

# DARU

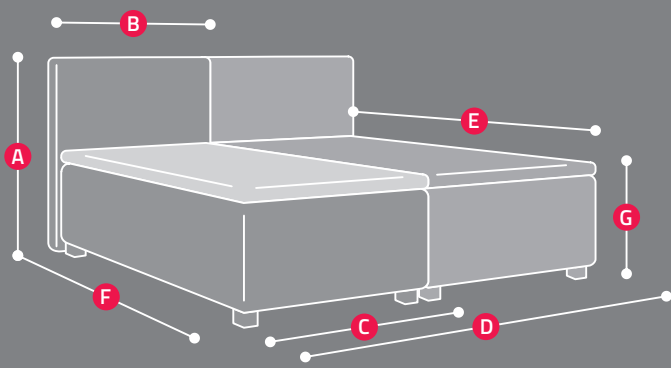

The DARU collection is addressed to people who value change. The biggest advantage of DARU beds is the variety of solutions and their mobility.

An advantage of the model is the removable cover, both on bed as well as on the headboard. This makes it possible to change the look of the furniture, as well as easy cleaning.

The DARU bed consists of four separate elements, easy to transport. It is also ideal for places of collective accommodation, such as hotels, guest houses or holiday centres.

DARU single beds can be put together and thanks to wheels installed in the back legs, they can also be easily moved.

## collection

---

# STORAGE

The STORAGE collection is a proposal for small spaces. Its advantage is simple form and practicality of use. The STORAGE collection features two different bed models with deep and spacious bed linen boxes of approx. 30 cm in height. Comfort is complemented with a layer of 7-zone pocket springs (35 mm high) with over 300 springs/m<sup>2</sup>.

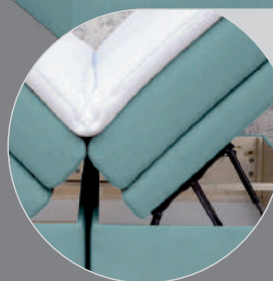

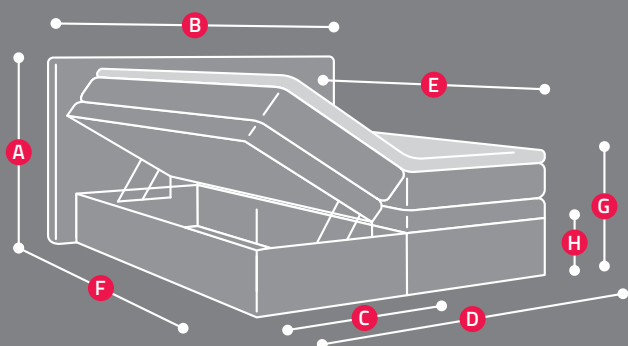

The base of the KOOFER model is made of 15 mm thick plywood. The top layer of the box is a frame made of solid wood and GOODSITE slats with a glass fibre core. The Koofer model opens along the long side, which allows access to the entire surface of the box.

The base of the NORA model is constructed from 18 mm thick anthracite-coloured laminated board. In the NORA model the chest can open both on the short and long side.

..\*The STORAGE collection requires two single mattresses. We also suggest using a top mattress in the MOTION version for easier opening of the box.

## WHAT IS AN UPHOLSTERED BED?

Upholstered furniture makes every interior gain a subtle and cosy atmosphere. Thanks to a wide range of colours of upholstery fabrics, as well as their types, adjusting a bed to the look of a bedroom is extremely easy.

We produce upholstered beds with standard, simple headboards which are perfect for minimalist bedrooms, as well as elegant, quilted headboards perfectly suited to stylish interiors.

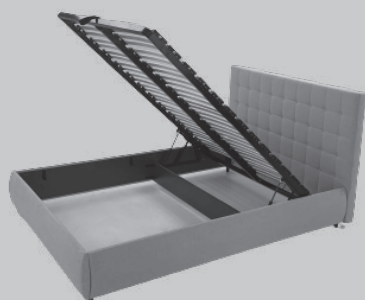

Upholstered beds are suitable for any bedroom. They can be a base for your existing or dreamed of mattress. We offer sets with or without a mattress in a whole range of fabric structures and colours.

# 1

### FRAME AND RACK

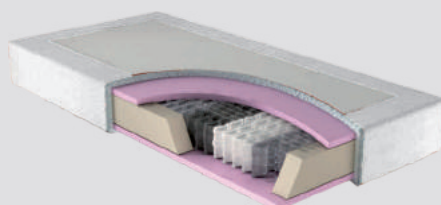

Beechwood frame, wooden or metal rack with spring bars that can be raised depending on the model

# 2

### MATTRESS

with built-in pocket springs, having 7 hardness zones arranged in accordance with the human anatomical structure

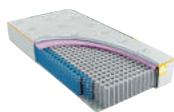

# 3

### HEADBOARD

Upholstered, it has a decorative as well as a practical function, providing a comfortable semi-seated position

## FEASY MATTRESS

The Feasy mattress is a unique product made of 100% pocket springs with a height of 17 cm. Inside the mattress, there are as many as 450 individual springs, where the central part consists of springs with a wire thickness of 2.0 mm, while the external part consists of springs with a wire thickness of 2.4 mm. Thanks to this structure, comfortable use of the mattress is ensured also when getting up from the bed.

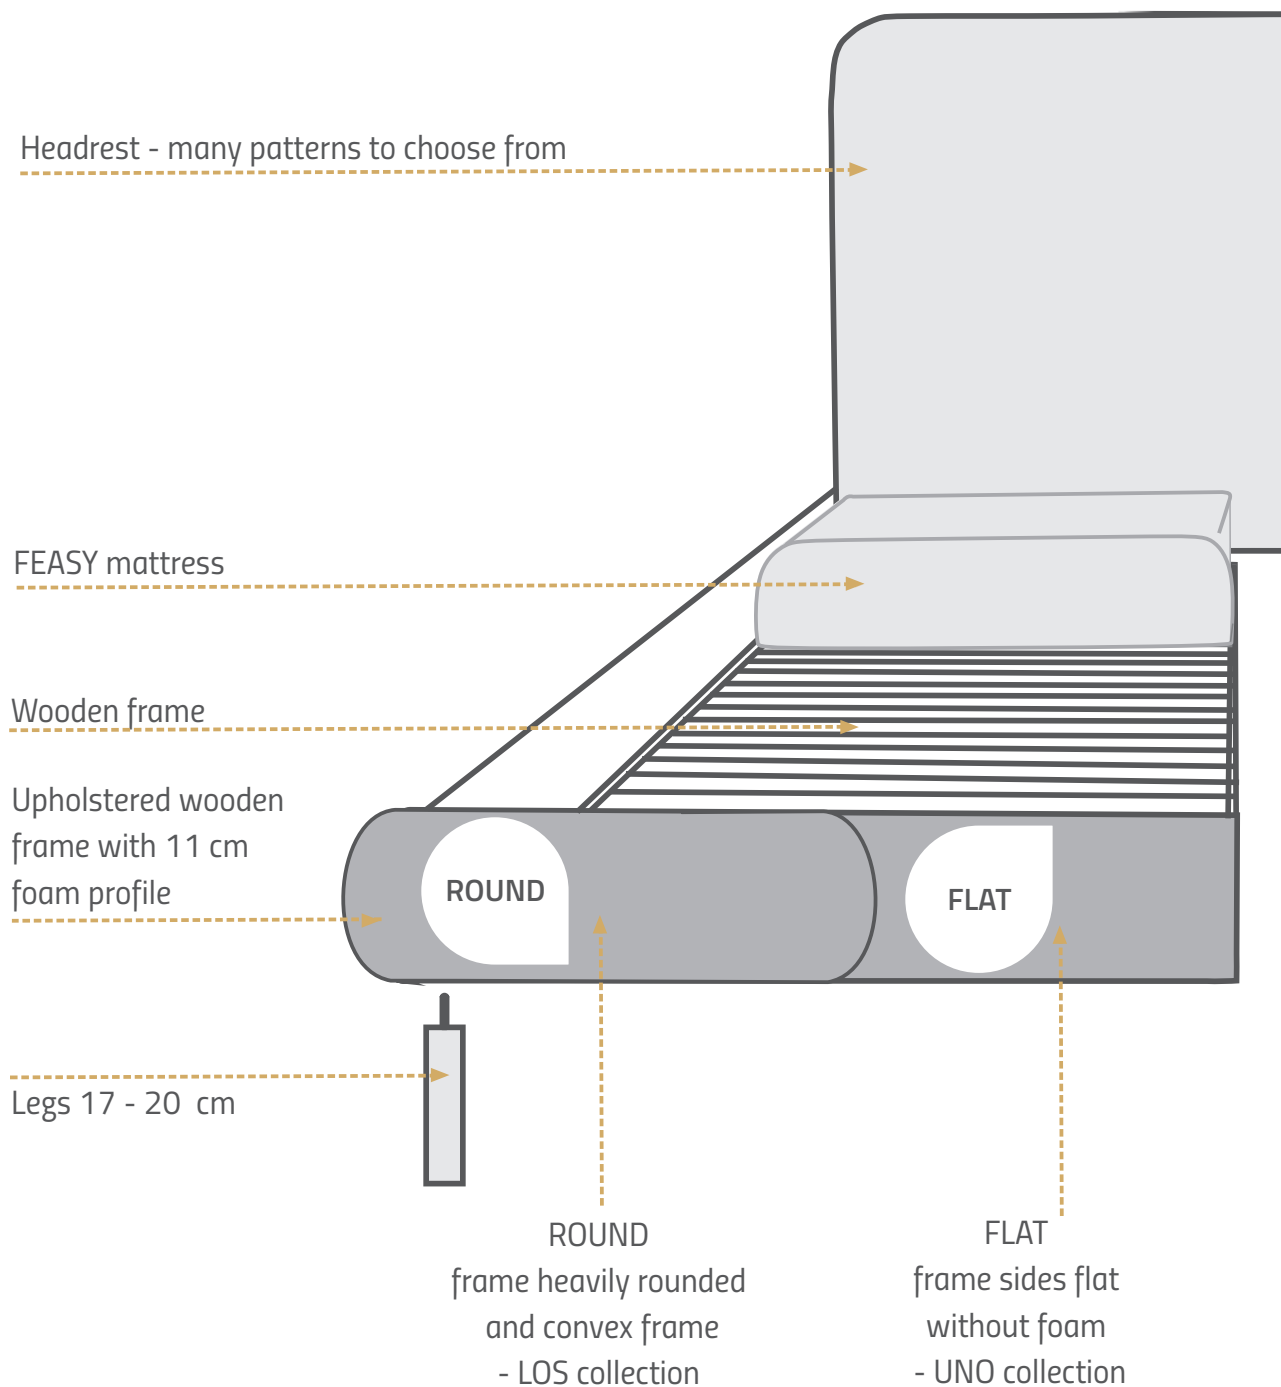

The mattress fabric used has antibacterial properties. The use of springs with such a height ensures optimal air circulation and internal ventilation of the entire mattress. These solutions result in longer life-span of the mattress and improve its hygienic qualities.
